

Àrea LED

Claudi Aguiló and Xavier Nogués, 1998

LOW-LEVEL LIGHTING BEACON, IDEAL FOR PARKS AND AVENUES
WHICH NEED SECONDARY LIGHTING

¹ | Especially suitable for parks and landscaped areas

² | Allows a stamped logo to be included

Área Beacon

This is an inclined position box; an illuminated marker on which a die-cast logo may be included to advertise a place or organisation. This gives the beacon an added advertising function.

Materials and finishes

• Body

Tetrahedron of corten steel sheet and internal reflector inclined on a polished AISI 304 stainless steel sheet, (when AISI 316 stainless steel is required, please ask for prices and delivery dates).

• Luminaire

Equipped with a LED module of 20 W protected with a polycarbonate diffuser and stainless steel grate.

Lamp

20W – 9LED (700 mA)

Power supply: 230V / 50Hz

Degree of protection: IP-67

Electric class I: (Class II consult)

Maintenance

Does not require maintenance

Installation

The fastening is carried out with 4 anti-rust protection steel bolts, previously placed in concrete. The template and the anchor bolts are delivered with the element. The element is delivered fully assembled. The assembly instructions are enclosed with the beacon.

Weight

45 Kg.
