

Maya

Antoni Roselló, 2002

URBAN LITTER BIN WHICH IS DEFINED AS A BRIDGE BETWEEN OPPOSITES: TRANSPARENCY AND OPACITY, LIGHTNESS AND ROBUSTNESS. CHARACTERIZED BY ITS PURE AESTHETICS AND EASE OF USE

- 1 | Easy removal of the waste
- 2 | Capacity 80 l.

Maya Litter bin

Designed to make it easy to deposit and collect waste, helping to clean up the environment. The Maya litter bin is composed of three elements: the lid which protects the inside, the deposit which consists of a large-capacity black bin and the body which gives the whole its shape and consistency.

Materials and finishes

• Lid

Lift-up lid in sandblasted finish AISI 316 stainless steel sheet with closing attachment.

• Body

Body in sheet metal and electro-polished finish AISI 304 stainless steel deployé sheet.

The central area is manufactured with deployé sheet and the lower area ends with three rod-legs, with a threaded washer which allows the element to be levelled.

• Bin

Black cylindrical self-extinguishing ABS bin.

Installation

The litter bin is fixed to the ground with three threaded rod legs which are introduced into holes previously made in the paving and filled with epoxy resin, fast-drying cement or similar.

The element is delivered assembled and the assembly instructions are enclosed.

Maintenance

Does not require maintenance

Weight

20 kg.

Capacity

80 l.
