

SANTA & COLE

Small, independent and global

Santa & Cole is a small, independent and global editor of design products. With roots in Barcelona, our lighting and furniture, as well as the recent addition of art works and musical instruments, are distributed in more than 85 countries.

Since 1985 we have been committed to creating quality products that improve our coexistence with the environment in our public and private life, at home or in the office. Sharing our way of experiencing material culture.

Catalogues

At Santa & Cole we aim to promote well-being through the objects that surround us, for which purpose our selection involves careful judgement.

Our catalogue timeline covers almost ninety years of design history. Lamps and pieces of furniture created in very different contexts but with an extraordinary emotional proximity emanating from the careful selection of materials and our obsession with light.

In 2021, we added works of art and musical instruments to our catalogue. Our art selection features artists of very different kinds: a collection of original works, series or Neoseries, always respecting intellectual property by means of authenticity certificates. And music, under the Milagro Luthiers brand, presented as an ode to sound and an elevation of the spirit. From person to person.

We are editors

Creating a catalogue involves establishing a criterion and sticking to it. Editing means publishing a work, generally authored by someone else. It is a daily choice: 'yes' to this and 'no' to that. We select, take risks and bring to light well designed products, works by our authors, whose authorship is protected and registered.

At Santa & Cole, as we edit, we imagine spending our entire lives with any of our products.

Product adaptations

We can adapt a product from our catalogue to the requirements of the project either in the customisation of materials, sizes, formats or colours.

We have a department of lighting projects and interior design to advise you on your project decisions. We provide the necessary tools and documentation, including samples, lighting studies and technical dossiers (photometrics, CAD, Revit, among others).

In case of requiring any product modification for your project, contact us so we can study your needs.

Quality and sustainability

At Santa & Cole we subcontract our production to the very best European hands, and those closest to Belloch (Barcelona), pampering each individual piece. We believe in serial manufacturing and handcrafted products. Look at the details, that is where we strive to deliver the ideal user experience. It is in such details one recognises the virtue of the craftsmen who make each object, something quite out of reach for a machine alone.

Highly technical in some aspects, quintessentially human in others, at Santa & Cole we convey memory by looking to the future. And we are moved by quality rather than by quantity, unhurried, not compelled by novelty.

Santa & Cole applies stringent internal standards, as well as complying with market quality norms. ISO 9001 and ISO 14001 quality certification evidences our commitment. We are also compliant with required international certifications such as CE marking and UL listing.

Flagship projects

Santa & Cole has helped to improve coexistence in a variety of public and private spaces. Projects of very different kinds feature our lighting installations: cultural, restaurants and catering, institutional, residential and retail establishments alike.
