### EC Regulations

#### CE

This marking on products in this catalogue indicates that they have been designed and produced in accordance with relevant applicable European directives and regulations. It is a guarantee of health and safety and the right to market these products freely in the Member States of the European Union, as proven by the corresponding CE declaration of conformity.

The main directives of the European Parliament and of the Council applied are:

- Directive 2014/35/UE, de 26 de February de 2014 (relating to electrical equipment designed for use within certain voltage limits).
- Directive 2014/30/UE, de 26 de February de 2014 (relating to electromagnetic compatibility).

#### I.E.E. (Energy efficiency index)

Pursuant to EU Directive 2013/30/EU and Commission Delegated Regulation (EU) 874/2012 of 12 July 2012 with regard to the energy labelling of electrical lamps and luminaires, these must have an energy label. The label classifies lamps and luminaires according to seven energy efficiency categories, from the most efficient (A++) to the least efficient (E).

#### UL

The UL certification process of our products entails a review of the design, production, testing, development and supervision in the factory, with regard to compliance of the product with the national safety standards of the US and Canada.

## Classification and regulations

### Classification of luminaires

#### CE

· Luminaire classification according to protection against electrical shock:

**CLASS I.** In addition to being electrically insulated, these luminaires are also provided with an earthing point.

**CLASS II.** These luminaires have either double or reinforced insulation so that exposed metal parts cannot become live.

**CLASS III.** Protection against electrical shock relies on supply at Safety Extra-Low Voltage.

· Classification according to the flammability of the support surface:

According to current legislation, luminaires can be mounted on flammable or non-flammable surfaces. Luminaires that are suitable for mounting on non-flammable surfaces do not require a symbol. Luminaires that are not suitable for mounting on normally non-flammable surfaces require a symbol according to the type of luminaire (in accordance with Figure 1 of European Standard EN 60598-1).

· Classification according to conditions of use:

Luminaires must be classified according to their intended conditions of use. Luminaires for normal use do not require a symbol, whereas luminaires designed for use in severe conditions require a symbol (in accordance with Figure 1 of European Standard EN 60598-1).

#### UL

Our luminaires are classified according to UL standards regarding the maximum voltages and powers assigned to the luminaire: Class 2 and non-Class 2.

## Classification and regulations

### Ingress Protection Classification CE

The Ingress Protection system (IP) defines various degrees of protection against the ingress of foreign bodies and moisture. It is indicated by the IP prefix followed by two digits, the first of which identifies degree of protection against the ingress of solid particles and the second against the ingress of liquids (IEC 529- EN 60529).

#### First digit:

**IP 0** - No protection.

**IP 1** - Protected against solid objects > 50 mm.

**IP 2** - Protected against solid objects > 12 mm.

**IP 3** - Protected against solid objects > 2.5 mm.

**IP 4** - Protected against the solid objects of 1 mm.

**IP 5** - Protected against dust.

**IP 6** - Protected against dust (totally).

#### Second digit:

**IP - 0** No protection.

**IP - 1** Protected against water falling vertically.

**IP - 2** Protected against direct water drips up to 15° from vertical.

**IP - 3** Protected against direct sprays up to 60° from vertical.

**IP - 4** Protected against sprays from all directions

**IP - 5** Protected against low-pressure jets from all directions.

**IP - 6** Protected against high-pressure jets from all directions.

**IP - 7** Protected against immersion between 15 cm and 1 m.

**IP - 8** Protected against immersion under pressure.

### Classification according to environmental location

Our luminaires are classified according to UL standards. There are three types of environmental location marking:

#### · Dry locations:

Intended for use in a location not normally subject to dampness, but may include a location subject to temporary dampness, as in the case of a building under construction, provided ventilation is adequate to prevent an accumulation of moisture is marked.

#### · Damp locations:

A damp location is an exterior or interior location that is normally or periodically subject to condensation of moisture in, on, or adjacent to, electrical equipment, and includes partially protected locations.

#### · Wet locations:

A wet location is a location in which water or other liquids may drip, splash or flow on or against electrical equipment.
