

Quality and Environmental Policy

At Santa & Cole, we believe that a company is not defined solely by its profits or growth, but by the value it contributes to society through its products, services, and relationships. We work to edit lighting and furniture elements that are honest, useful, and durable designed with purpose and responsibility.

Our products are developed with a strong focus on innovation, design, efficiency, and sustainability. We are committed to continuous improvement through quality, functionality, and respect for the environment. To support this, we set measurable objectives that help us improve both our environmental performance and the satisfaction of those who place their trust in us.

We are committed to complying with applicable legislation, customer requirements, and those of other relevant stakeholders, as well as any voluntary standards we adopt. We continuously monitor the internal and external context of our activity to respond responsibly and consistently to the legitimate expectations of employees, suppliers, authorities, and society at large.

Aware of the environmental impact our activity may cause, we are committed to protecting the environment and preventing pollution. We work to reduce the use of natural resources, improve energy efficiency, and minimize waste generation. We aim for our products -conceived with technical rigor and aesthetic intent- to be part of a balanced cycle, where creation generates economic, social, and emotional value without harming the environment we depend on.

Our business culture embraces environmental awareness as a core value, guiding both the organization's operations and the responsible conduct of every person who is part of Santa & Cole.

Santa & Cole's management firmly leads this commitment by ensuring the necessary resources are in place to implement and continuously improve our quality and environmental management system. This policy is clearly communicated throughout the organization, reviewed periodically, and made available to all relevant stakeholders.
